### **Costing terminology - AAT Comment**

Absorption costing is used when management want to determine the full cost of one unit of output, including a proportion of the overheads. This process is known as absorption costing because a proportion of the fixed cost is absorbed into the product cost. There are three stages involved in absorption costing: Allocation; Apportionment; Absorption

### **Study tips: understanding absorption costing - AAT Comment**

Luckily for AAT Students we start to cover this in Level 2, Introduction to Costing, where we compare the three main types of inventory valuation, First in First Out (FIFO), Last in First Out (LIFO) and, Average Costing (AVCO). It's fairly straightforward to visualise these valuation methods although each one has its advantages and disadvantages.
