The transition to clean energy will not be a simple matter of replacing coal with wind power or oil with solar; it will require us to adapt our energy usage as dramatically as we adapt our energy sources. Our Renewable Future is a clear-eyed and urgent guide to this transformation that will be a crucial resource for policymakers and energy activists.

...

Our Renewable Future: Laying the Path for One Hundred Percent Clean Energy. The next few decades will see a profound energy transformation throughout the world. By the end of the century (and perhaps sooner), we will shift from fossil fuel dependence to rely primarily on renewable sources like solar, wind, biomass, and geothermal power.

## **Our Renewable Future: Laying the Path for One Hundred**

...

Our Renewable Future examines the challenges and opportunities presented by the shift to renewable energy and explains why a clean energy future cannot happen by simply adding more solar panels and wind turbines. In the same way that our current "normal" is fundamentally different from that of the preindustrial world, we must reimagine our future at a

...

"The future of renewable energy is obscured by ignorance, noise, ideology, and all sorts of misconceptions --from both cornucopians and catastrophists. Our Renewable Future describes the reality: the transition is possible, but it won't be easy."--Ugo Bardi, University of Florence and The Club of Rome
